What We Offer

We Provide Stone Veneer Sheet With Best Quality

The Stone veneer having a real stone surface, it is a handmade product with German quality standard using Indian techniques. The Stone Veneer sheet has a 100% natural stone face specially manufactured with a fibre glass and resin backing to make it flexible, light weight and easy to install. It has a smooth and natural stone top surface, which can provide a high end and contemporary finish for your project. It is suitable for internal and external walls, flooring, showers, furniture & many more....

Stone-veneer can be applied over almost any strong substrate including concrete, fired, wood, metal, compressed wood, fiberglass, sponsor board, tile, dry wall, painted surfaces, MDF, Masonite, entryway skins and cabinetry. Stone-veneer has been tried and created as an improving stone covering veneer for use in various conditions, inside or outside. Stone-veneer has demonstrated to be a heavenly material at the point when a genuine stone completion and surface is wanted, yet weighty strong stone may not be functional. Stone-veneer isn't suggested for business flooring.

Stone-veneer Assortment: Indian Fall, Pre-winter Provincial, Harvest time White, Land Red, Copper, Multi color, Reddish, Mongolian, Dark Line, Silver Sparkle, Silver Dim, Multi Pink, Dark Record, Woodland, Jeera Green, Gold Green, Dark Star, Tan.

1. Sealers

All Stone-veneer need sealers and impregnators for stain and scratch security. The sealers and impregnators accessible in the market are polyurethane matt and reflexive, water based sealers and impregnators, dissolvable based sealers and impregnators. This large number of sealers are like the ones utilized in stone industry. It is ideal to pre-seal Stone-Facade sheets before establishment. This shields and seals the face from glues and grout during establishment and dealing with. Stone-Facade can be fixed with something similar sealers utilized for record, stone tiles, and wood. Sealers can be found at practically any home store. There are numerous sealers available with different suggested applications. If it's not too much trouble, test any sealer for the wanted shine and entrance preceding establishment.

2. Adhesive

It means quite a bit to know your cements; by understanding the particulars of the glue, a lot of time and cost can be saved. All cements ought to be tried preceding any establishment including thought of dampness and temperature in the arranged climate. Assuming the application is outside, thought to warm development should be considered. Since Stone-Facade is a facade it should grow and contract with the substrate or delamination might happen. Where glue groundworks are suggested the bond ought to be tried by the installer before definite establishment.

The rear of Stone facade might require a filler type cement for certain applications. For wet conditions, epoxies, polyester tar and water verification cements are the best applicant. Contact cements are not prescribed because of the lopsided support of Stone-Facade. Try not to utilize noncatalyzing (water fume type) fix cements where the substrate is a dampness boundary. Cement may not stick as expected whenever applied between non-permeable materials.

SLATE SERIES

SOUTH GREY

SIZE: 4ft x 8ft
PRICE: 9,500
